

## Japan by train: your tickets are finally just a click away with Japan Experience

With more than 30,000 km of rails, Japan has one of the densest and most efficient railway networks in the world. The train is the ideal solution for traveling across the country, since it allows you to go almost everywhere, from northern Hokkaido to southern Kyushu. Thanks to its speed, the quality of the service offered and the comfort of the equipment, taking the train becomes a real travel experience in itself and allows you to appreciate all the diversity of the landscapes that pass by.

Previously an almost automatic choice for traveling in Japan, the Japan Rail Pass, which saw its price increase in 2023, is no longer the ideal option for some travelers.

**It is with the aim of offering them an alternative and in order to continue to simplify travel to Japan, that Japan Experience launched its online train ticket service on March 1, 2024.**

More than 600,000 departures are already [available on our website!](#)

***"After the Japan Rail Pass price increase, some of our travelers were looking for another solution to continue traveling by train in Japan" Thierry Maincent***

**In partnership with Japan Railways (JR), the main Japanese railway company, Japan Experience now offers the online purchase of individual train tickets, drawing on its expertise and experience as the world's leading distributor of the Japan Rail Pass.**

This new service complements its range of regional train passes, Japanese public transport cards and thousands of articles and advice available online. Japan Experience thus becomes the only operator in the world to boast such a comprehensive train travel offer in Japan.

## Why book your ticket in advance?

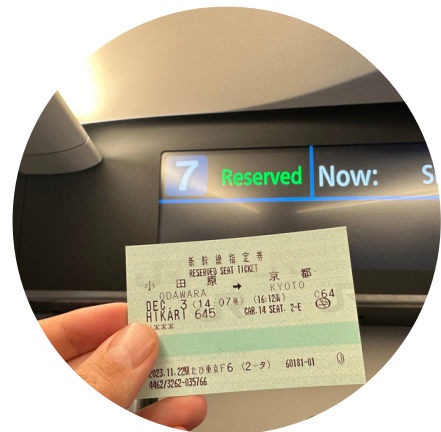

**Through a 100% digital reservation process,** a simple and effective exchange in Japan thanks to a QR code and access to JR machines across the country, this new service allows you to reserve your train tickets easily before departure.

**The choice of purchasing in advance is a real asset,** as booking on site can be a source of stress and difficulties. This also allows, during busy periods on Japanese trains, to reserve your seat in advance and not have the unpleasant surprise of full trains by purchasing your tickets on site.

**Travelers can also choose different train tickets** with reserved or free seats, Second Class or First Class, seats with a view of Mount Fuji... Other options will still be added, such as the reservation of additional or oversized baggage, many other journeys across Japan, as well as special and unique trains in the country, always to make travelers' lives easier and their trip unforgettable!

***“We continually invest in our platform and technology capabilities to provide travelers with everything they need, on one website.” Thierry Maincent***

After the launch of our JRP Carbon-free offer, which allows travelers who have purchased a Japan Rail Pass to offset part of their carbon footprint during their trip to Japan, this train ticket service is part of a more eco-responsible approach to tourism.

With the simple reservation of train tickets in Japan, Japan Experience wishes to continue to give travelers access to the large Japanese railway network and to encourage travel by train, which remains the most ecological means of transport.

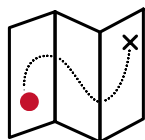

***“More than ever, Japan Experience’s mission is to help promote more sustainable tourism by making train travel simple and accessible.” Thierry Maincent***

## **4 reasons to take the train in Japan**

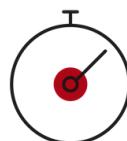

### **Flexibility**

Create your own route and enjoy a unique railway experience

### **Accessibility**

By train, you can easily explore all of Japan's must-see cities

### **Reliability**

Get to your destination quickly while enjoying unparalleled convenience

### **Eco-responsibility**

Travel sustainably by reducing your carbon footprint

# About Japan • Experience

**Japan Experience has been the leading tour operator specializing in Japan for over 40 years.**

Our team of Japan enthusiasts, spread between Tokyo, Paris, London, Berlin and Madrid, is here to offer our travelers the best possible experience, without intermediaries. Our goal is to make organizing a trip to Japan easy and accessible.

- **We help travelers plan their own trip. They will find with us everything they need for a successful trip: Japan Rail Pass, house rentals, activities and excursions, guided tours, transport passes, internet access, and now individual train tickets.**
- **We also support travelers by taking care to organize their stay in Japan, with more than fifty tours, accompanied or not, which adapt to their expectations while guaranteeing immersion in Japanese culture and way of life. .**

Our vision is guided by three commitments:

## **Freedom of choice**

Travelers are free to go where they want, to book what they want.

## **Simplicity**

We let travelers focus on what's important, and we take care of the rest.

## **Human above all**

For us, the very essence of travel is "the discovery of the other", of "elsewhere" and the "discovery of oneself".

Every year, we support more than 300,000 travelers in Japan and allow them to create the trip that suits them.

In addition to our products, we provide more than 5,000 articles on our website to share our advice, good deals and good addresses.

On social networks, we also make it our mission to talk about Japan every day, far from clichés, to inspire our community of 250,000 people and allow future travelers to organize their stay.
